Docket No. 50-029  
LS05-82-8-077

Mr. James A. Kay  
Senior Engineer - Licensing  
Yankee Atomic Electric Company  
1671 Worcester Road  
Framingham, Massachusetts 01701

Dear Mr. Kay:

SUBJECT: SEP TOPIC XIII-2, SAFEGUARDS/INDUSTRIAL SECURITY, YANKEE  
NUCLEAR POWER STATION

By letters dated February 23, 1979 and January 23, 1981, the Commission issued Amendments 55 and 63, respectively, to Facility Operating License No. DPR-3 for Yankee Nuclear Power Station.

These amendments incorporated the Security Plan and Safeguards Contingency Plan into the operating license. On November 1, 1981, the staff completed their review of the Guard Training Plans and the final evaluation report for this review is in the process of being issued. These amendments and the staff review satisfy the aspects of SEP Topic XIII-2 with respect to station security. We have determined that the aspects of Topic XIII-2 regarding fuel accountability are adequately covered by the plant technical specifications, which require that records and/or logs be maintained relative to radioactive shipments, by-product material inventory, and new and spent fuel inventory and assembly histories.

Based on the above considerations, we have determined that SEP Topic XIII-2 is complete for Yankee. This letter is for information only and requires no response.

Sincerely,

*SEA*
