Docket/License: 50-289/DPR-50

Mr. T. Gary Broughton
Vice President and Director, TMI
GPU Nuclear Corporation
Three Mile Island Nuclear Station
Post Office Box 480
Middletown, PA 17057-0191

Dear Mr. Broughton:

SUBJECT: NRC INSPECTION REPORT NO. 50-289/93-26

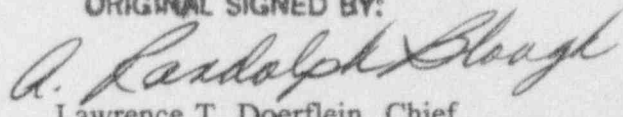

This letter transmits the findings of the resident safety inspection conducted by Ms. M. Evans and Mr. D. Beaulieu from December 7, 1993 - January 17, 1994, at the Three Mile Island Nuclear Station Unit 1. The inspectors based these findings on observations of activities, interviews, and document reviews and discussed them with Mr. M. J. Ross and other members of your staff. Inspector observations indicated safe and conservative operation.

This report discusses an NRC identified violation which is not being cited because our review found that this issue was promptly raised to management attention, was of low safety significance, and was followed up with prompt and effective corrective actions. The issue involved the radiation monitoring system surveillance where an I&C technician who performed calculations and the independent verifier signed the procedure calculation enclosure prior to completion of the calculations. Our decision not to cite this item is based on the NRC enforcement policy goal of encouraging licensees to aggressively and thoroughly pursue correction of problems.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room. We appreciate your cooperation.

Sincerely,

ORIGINAL SIGNED BY:

Lawrence T. Doerflein, Chief
Projects Branch No. 4
