## SUMMARY

### Scope:

This routine, announced inspection was conducted in the areas of the Physical Security Program for Power Reactors. Specifically; Management Support and Audits; Protected and Vital Area Physical Barriers and Assessment Aids; Access Control; Alarm Stations; and Compensatory Measures.

### Results:

In the areas inspected, violations or deviations were not identified. The licensee's security program was determined to be effective in providing an acceptable level of protection against radiological sabotage. The performance of the security force was reflected in the professionalism displayed in carrying out their duties and in their management's commitment of support.
