Docket No. 50-461

Illinois Power Company
ATTN: J. S. Perry
Senior Vice President
Clinton Power Station
Mail Code V-275
P. O. Box 678
Clinton, IL 61727

Dear Mr. Perry:

Thank you for your letter dated December 7, 1993, in response to our November 8, 1993 letter concerning a damaged and/or substandard segmented ring which was possibly reinstalled into the Reactor Water Cleanup (RWCU) isolation valve (1 G33F100) at the Clinton Power Station.

In our letter, we requested that you investigate whether a damaged and/or substandard segmented ring was reinstalled into the RWCU valve and whether the damaged ring was hidden from Quality Assurance personnel. We also requested that you submit the results of your investigation to the NRC.

Your response indicated that no unsatisfactory hardware condition exists in RWCU valve 1 G33F100 and that no damaged segmented ring was hidden from Quality Assurance personnel. We found your investigation to be sufficient to support your conclusions and have no additional questions regarding this matter. We request that you retain the supporting documentation of your investigation of this matter for a minimum of one year from the date of this letter.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter will be placed in the NRC Public Document Room.

Your cooperation is appreciated.

Sincerely,

Original signed by E. G. Greenman.

Edward G. Greenman, Director
Division of Reactor Projects
