Subject: Arkansas Nuclear One - Units 1 and 2
 Docket Nos. 50-313 and 50-368
 License Nos. DPR-51 and NPF-6
 Changes to the Proposed Revision to the Industrial Security Plan
 (TAC Nos. M87718 and M87719)

Gentlemen:

By letter dated September 4, 1993 (OCAN099301), Entergy Operations submitted a proposed revision to the Arkansas Nuclear One (ANO) Industrial Security Plan (ISP). Based on conversations with the Staff in a meeting on December 14, 1993, Entergy Operations is proposing changes to our September 4, 1993, submittal which would allow flexibility to determine the optimal security compensatory measures based on plant activities. Changes to the proposed revision to the ISP and supporting documentation provided in our September 4, 1993 submittal are attached.

The "no significant hazards consideration" of the September 4, 1993 submittal remains unchanged by this information. The attached material contains current and proposed security measures; therefore, Entergy Operations has determined that the attached documentation contains safeguards information as specified by 10CFR.73.21 and should be handled accordingly.

Very truly yours,

JWY/nbm
