SUBJECT: NRC INSPECTION REPORT 50-445/94-02; 50-446/94-02

This refers to the inspection conducted by L. E. Ellershaw, P. A. Goldberg, and R. C. Stewart of this office on January 3-14, with in-office review until January 20, 1994. The inspection included a review of activities authorized for your Comanche Peak Steam Electric Station, Units 1 and 2, facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report. Additional information was discussed in a telephone conversation between Mr. T. Hope of your staff and Mr. Lee Ellershaw of NRC Region IV, on January 20, 1994.

Areas examined during the inspection are identified in the report. These areas dealt with the effectiveness of your program for assuring the reliability and operability of safety-related check valves. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. The results of this inspection are documented on page 2, in the enclosed report.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Thomas P. Gwynn, Director  
Division of Reactor Safety
