Dear Mr. Feys:

SUBJECT: NRC INSPECTION REPORT 999-90003/94006(DRSS)

This refers to the special inspection conducted by Mr. D. G. Wiedeman of this office on February 2, 1994, of your facilities formerly occupied by Bendix Corporation, located at 12950 W. Eight Mile Road, Oak Park, Michigan. Licensed activities were previously authorized by Atomic Energy Commission (AEC) Byproduct Material License No. 21-01931-03. The results of our preliminary survey findings were discussed with you and your staff at the conclusion of the inspection on February 2, 1994. This also refers to the telephone conversation between you and Mr. D. G. Wiedeman on February 14, 1994, regarding the results of our laboratory analyses of samples taken at the time of our inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. The inspection consisted of a selective examination of representative records from the former license file, observations, independent measurements, and interviews with the current and former owners and occupants of the building. Based upon this inspection, we have concluded that the facilities (buildings and grounds) located at the above referenced address were decontaminated to a residual radiation level consistent with current NRC guidelines. Consequently we have no further questions regarding this matter.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosure to this letter will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning the inspection.

Sincerely,
Original Signed by Gary L. Shear
