RE: Reno Creek Project Amendment Application and Permit Transfer, TFN 2 3/309

Dear Mr. Almas:

This letter is to confirm our telephone conversation of today in which I explained a problem with the Reno Creek Project amendment application. That problem is, simply, that Permit 479 is in the name of Energy Fuels Exploration Company, while the amendment application is in the name of Energy Fuels Nuclear, Inc. For the purposes of this permit and amendment, both must carry the same corporate name.

As we discussed, the best way to remedy this situation would be to transfer the existing Permit 479 from Energy Fuels Exploration Company to Energy Fuels, Nuclear, Inc. This will require completion and submission of the following:

- Permit Transfer Form 1(t)
- General Surety Bond Rider Form 20TH2
- License to Mine Form 3
- License to Mine Fee of \$25.00

The forms listed above are enclosed. Please submit three (3) copies of each form with one (1) original copy of each form to the Land Quality Division District III Office in Sheridan. The original of each form must remain intact, i.e. must remain double-sided and/or double-sided and attached.
