Mr. Frigyes Reisch, Chief Engineer  
Swedish Nuclear Power Inspectorate  
Box 27106  
102 52 Stockholm, Sweden

Dear Mr. Reisch

As I promised, enclosed are some reports that I thought might provide some useful background information for your safety assessment. The summary of the Systematic Evaluation Program describes the major findings of that program, and the 1977 Commission Paper includes a listing of the topics covered by that program. The 1993 Commission Paper describes the scope of review we expect to cover for license renewals. I've also enclosed a current version of NUREG 0933, which provides the status of generic safety issues. These generic safety issues usually do not yet have a solution and, therefore, are not appropriate subjects for a nuclear power plant safety evaluation. However, the status of these generic safety issues is useful information to better define the scope of issues to be addressed in a comprehensive safety evaluation for a nuclear power plant.

If you have any questions regarding this information, please call me.

Sincerely,

Original Signed By

Christopher I. Grimes, Chief  
Technical Specifications Branch  
Office of Nuclear Reactor Regulation
