Docket No. 70-1100
License No. SNM-1067

Mr. Robert C. Pierson, Chief
Licensing Branch
Division of Fuel Cycle Safety and Safeguards
Office of Nuclear Materials Safety and Safeguards
U.S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, D.C. 20555

Subject: **Amendment Application for SNM-1067**

Dear Mr. Pierson:

With the termination of uranium-bearing manufacturing operations in Windsor, the reduced scope of the laboratory operations, and the initiation of decontamination activities, substantially different license conditions become appropriate for our Windsor special nuclear material license. This letter provides an amendment application that is a complete rewrite of License No. SNM-1067.

Because of the termination of uranium-bearing fuel manufacturing operations and the significant reduction in the possession limits for the ongoing laboratory operations, we have concluded that this application meets the requirements of 10CFR51.22 (c) (11) and therefore qualifies for a categorical exclusion from the requirements for the Nuclear Regulatory Commission to perform an environmental assessment.

Enclosure I contains the complete rewrite of SNM-1067. All pages in the document are identified as Revision 10 to "rezero" the application with an arbitrary revision number greater than any previously used in the document. Six (6) copies of the letter are provided herewith for your use.
