Attention: Mr. D. J. Berger
Executive Assistant

Gentlemen:

This refers to your letter of May 8, 1959 in which you requested that your Special Nuclear Material License be amended to authorize the burning of solid waste contaminated with radioactive material.

In order that we may continue our evaluation of this request, you should provide us with the procedures you will use to prevent the accumulation of a critical mass of U-235, particularly in the incinerator ashes.

This information should be submitted in quadruplicate over the signature of a duly authorized corporate officer.

Very truly yours,
