

September 1, 1982

Docket No. 50-245
LS05-82 -09-004

Mr. W. G. Council, Vice President
Nuclear Engineering and Operations
Northeast Nuclear Energy Company
Post Office Box 270
Hartford, Connecticut 06101

Dear Mr. Council:

SUBJECT: SEP TOPIC III-1, QUALITY GROUP CLASSIFICATION OF COMPONENTS
AND SYSTEMS - MILLSTONE NUCLEAR POWER STATION UNIT 1

The draft safety evaluation for SEP Topic III-1, "Classification of Structures, Components and Systems (Seismic and Quality)," which was forwarded to you on May 5, 1982, is now considered a final safety evaluation report. Our basis for this position is that you have not responded to the factual correctness of the draft report within the last 110 days (a 30 day response was requested). Also, the actual classification of structures, systems and components used in Topic III-1 was previously reviewed and confirmed to be accurate by you in a letter dated August 26, 1981. The open items in that topic report will be factored into the integrated assessment.

Sincerely,

James Shea, Project Manager
Operating Reactors Branch No. 5
Division of Licensing
