Division of Licensing and Regulation  
Washington 25, D. C.

Attention: Mr. C. P. McCallum

Gentlemen:

We have been advised by Miss Alice M. Corley, Research Services Branch, Oak Ridge, Tennessee, that the special material required for the ACF Industries Contract No. 03-4964-1476 is being shipped approximately April 25, 1958.

It is our desire to be able to start work on this material as soon as possible. As a matter of fact, we had anticipated doing so as soon as the material had been received in view of my conversation with you on March 31 when you advised that the license was in the final stages of approval, and that we could reasonably expect that it would be mailed to us by the end of the week of March 31. In this regard you might be interested to know that an item in the April issue of the Atomic Industrial Forum magazine "The Forum" indicated that the license had been granted.

To date we have not received the license. We would, therefore, appreciate an indication from you as to the status of our application.

Very truly yours,

CLEVITE RESEARCH CENTER

R. L. Shearer
