Oak Ridge, Tennessee

Attention: Miss Alice M. Corley, Chief

Subject: Special Nuclear Material Requirements  
for the Swedish Test Reactor

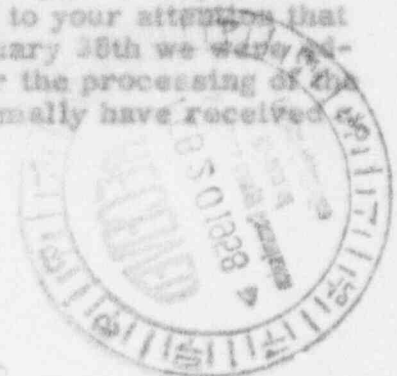

Gentlemen:

We wish to acknowledge receipt of your letter of January 24th addressed to our Mr. A. Perout together with the four (4) partially completed copies of the Special Nuclear Material Order Form. These have been completed, signed and the original and two (2) copies are enclosed herewith.

In response to the questions noted in your letter, our answers are as follows:

1. The use of AEC containers is requested.
2. The lot of 8,000 kg. of U-235 should be packaged in one (1) container.
3. & 4. One (1) shipment of one (1) container only.

We understand from the last paragraph of your letter that it will not be possible for you to place an order for the processing of the material with your contractor until you have received advice from AEC Headquarters that Clevite is appropriately licensed to receive and possess special nuclear material. In this regard we wish to bring to your attention that during discussions with AEC Headquarters on January 30th we were advised that it is possible for you to place orders for the processing of the material even though the applicant may not yet formally have received license to receive and possess the material.

We trust there is no conflict here and that you will be able to proceed especially in view of the fact that in order to meet the requirements of our contract with ACF Industries, Inc. we will require delivery of the special nuclear material in Cleveland on or before April 1st.

Your kind cooperation will be greatly appreciated.

Sincerely yours,

CLEVITE RESEARCH CENTER
