Gentlemen:

This refers to the inspection conducted by Mr. H. W. Roberds of this office on July 26-30, 1982, of your facility at Salt Lake City, Utah, associated with the fabrication of piping restraints and to the discussions of our findings with Mr. R. A. This inspection was made as a result of the identification of weld deficiencies in restraint assemblies that have been furnished to the Comanche Peak Steam Electric Station, Units 1 and 2.

Areas examined and our findings are discussed in the enclosed report. Within these areas, the inspection consisted of an examination of procedures and representative records, interviews with personnel, and observations by the inspector.
