Attention: Ms. Betty Wright
Export/Import Licensing Officer

Subject: Export Licensing Application for Ultrasonic
Weld Inspection System

Dear Ms. Wright:

We hereby request an XCOM License to export equipment/components described in 10 CFR Part 110.8 (e), in specific an "Ultrasonic Weld Inspection System" as described in the attachment. This equipment is to be exported to the country of Spain. The ultimate consignee is Empresa Nacional del Uranio S.A. (ENUSA), Juzbado, Salamanca, Spain. There will be no intermediate consignee.

This equipment is to be used on GE Nuclear Energy designed boiling water reactor nuclear fuel to assure the quality of welds on fuel rods making up the fuel bundles fabricated at their facility. ENUSA is not licensed and has no plans to become licensed for the handling of Mixed (U,Pu) Oxide fuel.

We are requesting the license to be issued for five years, so that we will be able to ship spares and warranty replacement parts for the system in the future. The dollar value would be \$600,000.00 in total. This equipment is schedule for shipment on or about April 1, 1994 from GE Nuclear Energy, 2117 Castle Hayne Road, Wilmington, NC 28401.

Enclosed also is General Electric Company's check # 2489338 in the amount of \$5,300.00 payable to the U.S. Nuclear Regulatory Commission for the processing and issuance of this export license as required by law. Your assistance is urgently requested in order that a license may be issued in a timely manner to meet scheduled shipping date and installation at the fabrication

Ms. Betty Wright
