**DOCKET 50-155 - LICENSE DPR-6 - BIG ROCK POINT PLANT - UPDATE TO NRC
INSPECTION REPORT 92-013, ITEM 04, EMERGENCY OPERATING PROCEDURES.**

NRC letter dated July 17, 1992, transmitted the subject Inspection Report covering the EOP Inspection conducted on June 15-19, 1992 at the Big Rock Point facility. Consumers Power Company submittal dated September 16, 1992, provided an initial response to the Inspection Report, and a meeting was held in the Region III office on October 22, 1992. NRC Inspection Report 92-024 dated November 25, 1992, provided a summary of this meeting. By letter dated February 17, 1993, a follow up response was provided to the NRC detailing efforts taken or planned to be taken with regards to Open Items 92013-01, 92013-03, and 92013-04. The last correspondence on this subject was a NRC letter dated March 2, 1993, documenting that the open items would be examined during future inspections.

The purpose of this letter is to provide an update on the progress of Big Rock Point's efforts in this matter for consideration in future inspection efforts conducted by your office. Attached are copies of the EOP Writes Guide and the Validation and Verification Guidelines. The revised EOPs and Technical Bases were issued August 13, 1993; and the RO/SRO training was completed prior to the facility resuming operation after the 1993 Refueling Outage.
