Mr. Leif J. Norrholm, Chief  
Vendor Inspection Branch  
Division of Reactor Inspection  
and Licensee Performance  
Office of Nuclear Reactor Regulation  
US Nuclear Regulatory Commission  
Washington, DC 20555

SUBJECT: DISPOSITION OF ERROR NOTICES RECEIVED FROM  
BOEING COMPUTER SERVICES

Ref: 1. NRC letter, Docket No. 99900505 dated December 16, 1993, same subject  
2. My letter dated January 31, 1994 requesting 45 day extension

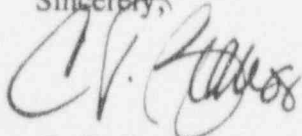

Dear Mr. Norrholm:

We have completed our review on all safety related applications of software provided by Boeing Computer Services (BCS). The only project where we used this software was our use of the BCS version of GT STRUDL on Carolina Power and Light's (CP&L) H.B. Robinson Plant. The software was used on the 79-14 program for the Steam Generator Replacement. CP&L has been notified of this application by letter today.

Our user records are available for your examination in our offices at Two World Trade Center, New York, NY, if you so desire.

Thank you for your assistance and if I can be of further assistance, please call me at (404) 662-2027.

Sincerely,

C. T. Brandt  
Vice President
