Arkansas Power and Light Company  
ATTN: Mr. William Cavanaugh III  
Senior Vice President - Energy Supply  
Post Office Box 551  
Little Rock, Arkansas 72203

Gentlemen:

This refers to the Systematic Assessment of Licensee Performance (SALP) Board Report of the Arkansas Nuclear One, Units 1 and 2, facility. The SALP Board met on September 16, 1981, to evaluate the performance of the subject facility for the period July 1, 1980, through June 30, 1981. The performance analyses and resulting evaluation are documented in the enclosed SALP Board Report. These analyses and evaluation were discussed with you at your Arkansas Nuclear One offices on September 16, 1981.

The performance of your facility was evaluated in the selected functional areas identified in Section IV of the enclosed SALP Board Report.

The SALP Board evaluation process consists of categorizing performance in each functional area. The categories which we have used to evaluate the performance of your facility are defined in Section II of the enclosed SALP Board Report. As you are aware, the NRC has changed the policy for the conduct of the SALP program based on our experiences and the recently implemented reorganization which emphasizes the regionalization of the NRC staff. This report is the product of the revised policy.

During the SALP meeting held at Arkansas Nuclear One on September 16, 1981, you committed to provide a status report and description of your plans in the area of drawing control. You fulfilled this commitment by submitting a status report and description of your plans by letter, dated September 30, 1981. In addition, you forwarded comments by letter, dated July 14, 1982, in response to our June 25, 1982, request for comments concerning our evaluation of your facility. Your letters of September 30, 1981, and July 14, 1982, a copy of the 1981 SALP Report, our letters, dated June 25 and July 27, 1982, and a copy of this letter will be placed in the Public Document Room.
