

FEB 23 1994

(See List of Addressees)

Dear:

This letter is to inform you of planning related to the Nuclear Regulatory Commission's decision to consolidate the Region IV and Region V offices in Arlington, Texas. A transition plan has been established to ensure a smooth transition to the new alignment of the Region IV office with a field office in Walnut Creek, California. The transition plan identifies tasks to be completed and provides a schedule for the transfer of program responsibilities to the Region IV office.

In accordance with the plan, Region IV will assume the lead for event response for current Region V licensees on March 1, 1994. The NRC Incident Response Plan, NUREG-0728, Rev. 2, is the operative document that describes the way in which the NRC responds to events.

The remaining Region V program responsibilities are scheduled to be transferred to Region IV in April 1994. At that time the current Region V office will become a Region IV Field Office. The Region IV Regional Administrator will assume all Regional responsibilities currently assigned to Regions IV and V.

If you have any questions regarding emergency response activities, please contact Eugene F. Bates, the Region IV Emergency Response Coordinator, at (817)860-8233.

Sincerely,

Original Signed By

L. J. Callan
Regional Administrator

(See List of Addressees)

Dear:

This letter is to inform you of planning related to the Nuclear Regulatory Commission's decision to consolidate the Region IV and Region V offices in Arlington, Texas. A transition plan has been established to ensure a smooth transition to the new alignment of the Region IV office with a field office in Walnut Creek, California. The transition plan identifies tasks to be completed and provides a schedule for the transfer of program responsibilities to the Region IV office.

In accordance with the plan, the emergency response functions and responsibilities of the current Region V office will transfer to the Region IV office on March 1, 1994. Region IV will then assume the lead for event response for the current Region V licensees. The NRC Incident Response Plan, NUREG-0728, Rev. 2, is the operative document that describes the way in which the NRC responds to events.

To minimize confusion and turmoil with the current Region V licensees and States, other Region V program responsibilities will be turned over to Region IV as early as possible. We are targeting on-or-about April 4, 1994, to turn over all other responsibilities.

Following the transfer of Region V program responsibilities to Region IV, the current Region V office will revert to a Region IV Field Office. The Region IV Regional Administrator will assume all Regional responsibilities currently assigned to Regions IV and V.

If you have any questions regarding emergency response activities, please contact Eugene F. Bates, the Region IV Emergency Response Coordinator, at (817)860-8233.

Sincerely,

L. J. Callan
Regional Administrator
