

February 28, 1994

Docket No. 50-440

Centerior Service Company
ATTN: Mr. Robert. A. Stratman
Vice President
Nuclear - Perry
P.O. Box 97, S 270
Perry, OH 44081

Dear Mr. Stratman:

SUBJECT: REQUALIFICATION EXAMINATION REPORT

During the week of January 31, 1994, Mr. D. McNeil and others of this office administered requalification examinations to employees of your organization who operate and handle fuel at your Perry Nuclear Generating Station. At the conclusion of the examinations, any generic findings that evolved as a result of the examinations were discussed with those members of your staff identified in the enclosed report.

Eight Reactor Operators (ROs) and six Senior Reactor Operators (SROs) were given complete requalification examinations. All operators passed their individual examinations. One additional SRO participated in the dynamic simulator portion of the examination. Three crews (one staff crew and two operations crews) were given dynamic simulator examinations. One operations crew failed the dynamic simulator portion of the examination.

Based on the results of the examination, the Perry Nuclear Generating Station requalification program has been assigned an overall program rating of satisfactory in accordance with the criteria of NUREG-1021, Revision 7, Operator Licensing Examiner Standards, ES-601. For those individuals with unsatisfactory results, the facility should take corrective action as required by its approved requalification program.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosures will be placed in the NRC Public Document Room.
