Dear Mr. Morisi:

SUBJECT: NUREG-0737 ITEM II.F.1-1 "NOBLE GAS EFFLUENT MONITOR"

RE: Pilgrim Nuclear Power Station

We have completed our review of your submittals dated February 27, 1981 and June 4, 1982 on the subject item, and find that sufficient information to meet the objectives of Attachment 1 of Item II.F.1, NUREG-0737 has been provided.

Based on our review of your submittals, we now conclude that no technical deviations from the NUREG-0737 requirements for Item II.F.1-1 have been identified. In addition, your letter of January 25, 1982 indicated that this item had been completed for Pilgrim.

Consequently, we find your description of the provisions taken by Boston Edison Company to satisfy Attachment 1 of Item II.F.1 to be acceptable and consider this item resolved for Pilgrim.

As noted in our December 8, 1981 letter on this subject, changes to your plant Technical Specifications (TS) will be necessary to fully implement this NUREG item. We will advise you as to the schedule for submittal of such TS changes in the near future.

Sincerely,
