Mr. Timothy F. Hagan
Nuclear Regulatory Commission
7915 Eastern Avenue, Room 286
Silver Spring, Maryland

RE: RFP No. RS-ADM-79-390

Dear Mr. Hagan:

We are pleased to submit our technical and cost proposals in response to the referenced solicitation.

We believe we clearly understand NRC's expanded requirements, as specified in your statement of work. Our technical discussion contains both "what" we plan to provide to the DTIDC and "how" we intend to meet and control these activities.

As you are aware, CDSI has recently moved the NRC inventory and fulfillment activity into newly remodelled facilities on Pearl Street here in Bethesda. We spent about \$ insuring that proper shelving and work space are committed to the NRC project, both now and in the future.

Please review our offer carefully. We believe it provides NRC a responsive and effective approach to meeting your specified support requirements. We invite you to visit our staff and facilities to review our proposals in more detail, if you so desire.

Please call on us if you need further clarification.

Yours truly,

Clifford M. Kendall
President
