Ivan Selin, Chairman

Nuclear Regulatory Commission

Washington, DC 20555

Dear Chairman Selin;

I recently learned that Louisiana Energy Services wants to build a factory that produces enriched uranium near Homer, Louisiana.

I feel very strongly about protecting the environment. I also feel people should not be treated differently because of where they are from. Because the people that live in Forest Grove and Center Springs are mostly blacks, I hope environmental racism is not being committed.

Some of Homer's residents are afraid that the 4000 tons of hazardous waste the factory will produce each year will harm their health.

Chairman Selin, I am asking you to talk with the people of Forest Grove and Center Springs. Please find out how they feel about this situation before you make this decision that could affect so many.
