MEMORANDUM FOR: ✓ William J. Dircks, Executive Director
for Operations

FROM: John C. Hoyle, Acting Secretary

SUBJECT: STAFF REQUIREMENTS - DISCUSSION AND POSSIBLE
VOTE ON LASALLE-1, 11:00 A.M., THURSDAY,
AUGUST 5, 1982, COMMISSIONERS' CONFERENCE ROOM,
D.C. OFFICE (OPEN TO PUBLIC ATTENDANCE)

The Commission* was briefed by staff of NRR and Region III on the status of allegations, review of the HVAC design and fabrication, and other review items of the proposed full power operating license for LaSalle-1.

The Commission, by a vote of 4-0, authorized the Director, NRR to issue a full power amendment to the LaSalle-1 operating license, subject to the following two license conditions:

1. Prior to exceeding 5 percent power operation, the licensee must provide formal documentation of information regarding HVAC design fabrication and installation, discussed in meetings with the NRC on August 2-4, 1982.
2. Prior to exceeding 50 percent power operation, the licensee shall submit to the NRC the results of an independent review of the HVAC system, including design changes, fabrication, and installation. The review should encompass all safety-related HVAC systems and the effect of non-safety-related HVAC system failures on safety systems.

The conditions may be lifted by staff when the matter has been resolved to their satisfaction. Further, the Commission's authorization is given with the understanding that the Director, NRR, will act on the remaining 2.206 petition before issuing the license amendment.
