

UNITED STATES
NUCLEAR REGULATORY COMMISSION

WASHINGTON, D.C. 20555

July 9, 1982

OFFICE OF THE
COMMISSIONER

MEMORANDUM FOR: Chairman Palladino
FROM: John Ahearne *J. Ahearne*
SUBJECT: "AVAILABILITY OF MEDICAL TREATMENT TO
MINIMIZE EARLY FATALITIES POST SEVERE
REACTOR ACCIDENTS"

The attached information items indicate the NRC is determining the availability of medical services. Granted such information is important, can you provide any insight as to why this type of information acquisition is done by NRC rather than by FEMA, state and local governments, or licensees?
