Attention: Raymond N. Moore

Dear Mr. Moore:

Please consider this letter as application to import UF6 and UF308. This material would be imported from Australia, South Africa or other large scale producers of this material. It would be consigned to domestic utilities or to firms which process this material into nuclear fuel such as Westinghouse or General Electric. We are thinking in terms of multiple shipments of hundreds of tons over the next five years.

I am enclosing a copy of our most recent annual report which details our large scale dealings in other fuels, including oil and coal.

If we can provide any other information, please call on me.

Sincerely,

Arthur M. Mackwell
Arthur M. Mackwell
