IN RESPONSE REFER
TO FOIA-82-285

Dear Mr. Udell:

This is in further response to your letter dated June 23, 1982, in which you requested, pursuant to the Freedom of Information Act, access to documents which detail collective dose exposures in 1981 for operating nuclear power plants and which analyze this information. In particular you asked for a list of each plant and the 1981 person rem dose to the workforce.

We have completed our search and we have not located any additional documents or information beyond that which we have already made available to you under this request.

This completes action on your request.

Sincerely,

J. M. Felton, Director
Division of Rules and Records
Office of Administration

FREEDOM OF INFORMATION
ACT REQUEST

FOIA-82-285
Rec'd 6-24-82

Dear Mr. Harris:

Thank you for your prompt response to my June 3, 1982 Freedom of Information Act (FOIA) request asking for nineteen (19) categories of documents. In our phone conversation today you notified me that the requested materials will be deposited in the public document room at 1717 H St.

The purpose of this letter is to ask for one additional category of information as part of our June 3 inquiry. Specifically we would like copies of or access to documents which detail collective dose exposures in 1981 for operating nuclear power plants and any memoranda, studies or other documents which analyze this information. In particular, we would like a list of each plant and the 1981 person-rem dose to the workforce. If such a listing does not exist, then we request documents which include information about the degree of worker exposure at each operating reactor. Only information and documents for commercial power reactors is being requested.

Thank you for your attention to this matter.

Sincerely,

Richard A. Udell
