SUBJECT: Waterford 3 SES Unit No. 3
Special Nuclear Material License Application Docket No. 70-2946

REFERENCE: (1) Letter W3P82-1579 dated July 27, 1981
(2) Letter W3P82-0373 dated March 4, 1982

Dear Sir,

Attachment A contains updated pages which reflect personnel changes for our special nuclear material license application since our original submittal in Reference (1). Attachment B contains copies of two figures from the criticality analysis for the Waterford 3 spent fuel storage racks. This re-transmittal was requested by the NRC due to the lack of clarity in these two figures in our previous submittal of the analysis in Reference (2). These copies were produced from the original report and are the best available reproductions.

If you should have any questions, do not hesitate to contact us.

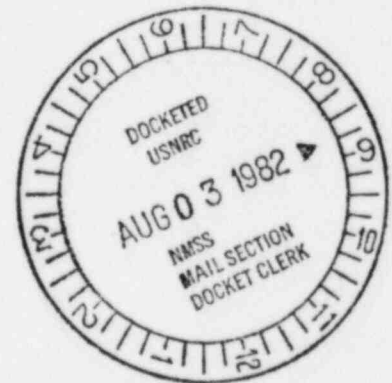

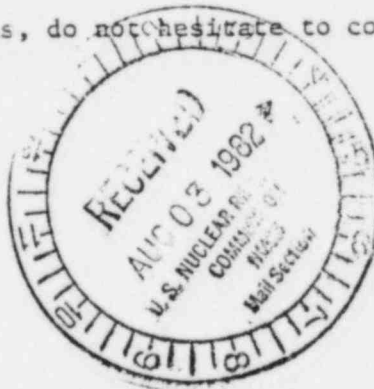

Yours very truly,

L. V. Maurin
