Gentlemen:

Subject: Report No. 50-261/82-20

This refers to the routine safety inspection conducted by Mr. S. Weise of this office on May 11 - June 10, 1982, of activities authorized by NRC Operating License No. DPR-23 for the H. B. Robinson facility. Our preliminary findings were discussed with Mr. R. B. Starkey, Plant General Manager, at the conclusion of the inspection.

Areas examined during the inspection and our findings are discussed in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspectors.

During the inspection, it was found that certain activities under your license appear to violate NRC requirements. These items and references to pertinent requirements are listed in the Notice of Violation enclosed herewith as Appendix A. Elements to be included in your response are delineated in Appendix A.

One violation listed in Appendix A was recurrent and uncorrected at the time of the inspection. Therefore, in addition to the need for corrective action regarding this specific violation, we are concerned about the implementation of your management control systems that permitted this recurrence. Consequently, in your reply, you should describe in particular those actions taken or planned to improve the effectiveness of your management control systems.

Further, we request you provide in your response a date and the method by which you will change your training instructions to reflect NRC policy on grading criteria for requalification programs.

We have examined actions you have taken with regard to previously identified enforcement matters. These are discussed in the enclosed inspection report.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosures will be placed in the NRC's Public Document Room unless you notify this office, by telephone, within ten days of the date of this letter and submit written application to withhold information contained therein within thirty days of the date of this letter. Such application must be consistent with the requirements of 2.790(b)(1).
