DISTRICT OF COLUMBIA CIRCUIT

333 Constitution Avenue, NW
Washington, DC 20001-2866
Phone: 202-216-7000 | Facsimile: 202-219-8530

AGENCY DOCKETING STATEMENT

Administrative Agency Review Proceedings (To be completed by appellant/petitioner)

- 1. CASE NO. 20-1019 2. DATE DOCKETED: 01/22/2020
3. CASE NAME (lead parties only) Commonwealth of Massachusetts v. U.S. Nuclear Regulatory Commission
4. TYPE OF CASE: [X] Review [ ] Appeal [ ] Enforcement [ ] Complaint [ ] Tax Court
5. IS THIS CASE REQUIRED BY STATUTE TO BE EXPEDITED? [ ] Yes [X] No
6. CASE INFORMATION:
a. Identify agency whose order is to be reviewed: U. S. Nuclear Regulatory Commission
b. Give agency docket or order number(s): 50-293 & 72-1044
c. Give date(s) of order(s): August 20, 22, 27 and December 17, 2019
d. Has a request for rehearing or reconsideration been filed at the agency? [ ] Yes [X] No
e. Identify the basis of appellant's/petitioner's claim of standing. See D.C. Cir. Rule 15(c)(2): Please see attached.
f. Are any other cases involving the same underlying agency order pending in this Court or any other? [X] Yes [ ] No
g. Are any other cases, to counsel's knowledge, pending before the agency, this Court, another Circuit Court, or the Supreme Court which involve substantially the same issues as the instant case presents? [ ] Yes [X] No
h. Have the parties attempted to resolve the issues in this case through arbitration, mediation, or any other alternative for dispute resolution? [ ] Yes [X] No

Signature \_\_\_\_\_ Date 02/26/2020
Name of Counsel for Appellant/Petitioner Seth Schofield, Joseph Dorfler, Liam J. Paskvan

Response to item 6(e): Basis of Petitioner's Standing.

The following statement supplements (but does not supplant) the statement regarding the Commonwealth's basis for standing that the Commonwealth filed in No. 19-1198 on October 29, 2020.

Petitioner Commonwealth of Massachusetts seeks judicial review of the following agency orders and actions in its consolidated petitions:

(i) the August 22, 2019 order approving the direct and indirect transfer of the Pilgrim Nuclear Power Station's (Pilgrim) Nuclear Regulatory

Commission (NRC) license from Entergy Nuclear Generation Company and Entergy Nuclear Operations, Inc. (collectively, Entergy) to Holtec Pilgrim, LLC and Holtec Decommissioning International, LLC (HDI) (License Transfer Order) and the related license amendment (License Amendment), Petition Attachment (Pet. Attach.) 2 & 3; (ii) the August 22, 2019 “Final No Significant Hazards Consideration” determination, Pet. Attach. 5, at 97, which made the License Transfer Order, License Amendment, and Trust Fund Exemption Order (defined below) effective immediately prior to a hearing requested by the Commonwealth; (iii) the August 22, 2019 Safety Evaluation upon which the License Transfer Order, License Amendment, Trust Fund Exemption Order, and No Significant Hazards Consideration determination are based, Pet. Attach. 5; (iv) the August 22, 2019 determination that the License Transfer Order and License Amendment are categorically excluded from any environmental review under the National Environmental Policy Act (NEPA), 42 U.S.C. §§ 4321-4347, Pet. Attach. 5, at 99, 105; (v) the August 22, 2019 order granting HDI an exemption from 10 C.F.R. § 50.82(a)(8)(i)(A) (restricting use of nuclear power plant decommissioning trust funds to radiological decontamination costs)

(Trust Fund Exemption Order), Pet. Attach. 6; (vi) the August 20, 2019 Environmental Assessment (EA) and Finding of No Significant Impact (FONSI) under NEPA for the Trust Fund Exemption Order, Pet. Attach. 8; (vii) the August 27, 2019 Issuance of Amendment No. 249 Regarding the Order Approving Direct Transfer of Renewed Facility Operating License and Independent Spent Fuel Storage Installation General License and Conforming Amendment for Pilgrim Nuclear Power Station, Pet. Attach. 9; and (viii) the December 17, 2019 NRC Memorandum and Order (CLI-19-11) denying the Commonwealth's application for a stay of the License Transfer Order, License Amendment, and Trust Fund Exemption Order, and permitting the continuation of the immediate effectiveness of the foregoing final unlawful agency actions (Memorandum and Order), Pet. Attach. 1.

To establish standing, the Commonwealth must show that it has suffered a cognizable injury, that the injury is fairly traceable to the NRC's actions, and that a favorable decision by this Court would be likely to redress the identified injury. *See Friends of the Earth, Inc. v. Laidlaw Envtl. Servs. (TOC), Inc.*, 528 U.S. 167, 180-81 (2000). The Commonwealth has standing because it is harmed by the NRC's

Memorandum and Order. In particular, the Commission, in its decision, wrongly denied the Commonwealth's application for a stay of the NRC's orders approving the License Transfer Application, License Amendment, and Trust Fund Exemption, which, again, were made immediately (and unlawfully) effective prior to the hearing before the NRC to which the Commonwealth was entitled to contest the merits of granting Holtec International's and HDI's requests. As described more fully below, the NRC's order making the License Transfer Order, License Amendment, and Trust Fund Exemption Order effective immediately have immediate environmental, public safety, and adverse financial consequences for the Commonwealth and its residents, those consequences are tied directly to the NRC's unlawful actions, and a favorable decision by this court would redress those harms by effectively staying the NRC's orders and actions until the NRC holds a hearing on the underlying merits.

Moreover, where, as is the case here, the Commonwealth "has been accorded a procedural right to protect [its] ... concrete interests," the Commonwealth "can assert that right without meeting all the normal standards for redressability and immediacy." *Lujan v.*

*Defenders of Wildlife*, 504 U.S. 555, 572 n.7 (1992); see *Lemon v. Geren*, 514 F.3d 1312, 1315 (D.C. Cir. 2008) (a party suffers a procedural injury when an agency fails to follow a statutorily-mandated procedure if that procedure could change the agency's mind in a particular matter); *Sugar Cane Growers Coop. v. Veneman*, 289 F.3d 89, 94-95 (D.C. Cir. 2002) (a party alleging a procedural injury "never has to prove that if he had received the procedure the substantive result would have been altered. All that is necessary is to show that the procedural step was connected to the substantive result.").

In *Lujan*, for example, the Supreme Court described procedural injury by explaining that "one living adjacent to the site for proposed construction of a federally licensed dam has standing to challenge the licensing agency's failure to prepare an environmental impact statement," 504 U.S. at 572 n.7, and this Court has defined "the archetypal procedural injury" as involving "an agency's failure to prepare a statutorily required environmental impact statement before taking action with potential adverse consequences to the environment." *National Parks Conservation Ass'n v. Manson*, 414 F.3d 1, 5 (D.C. Cir. 2005). In this case, like the example of the proposed dam in *Lujan*, the

facility at issue—the Pilgrim Nuclear Power Station (Pilgrim)—is located in Plymouth, Massachusetts, and the radiological and non-radiological contamination at Pilgrim and the spent nuclear fuel that will be stored there, perhaps indefinitely, pose significant public health, safety, environmental, and financial risks to both the Commonwealth and its citizens. Consistent with *Lujan* and reflective of the important state interests implicated by nuclear reactor licensing proceedings, the NRC’s regulations grant states in which a nuclear power plant is located automatic standing to intervene in a proceeding before the NRC regarding the plant. 10 C.F.R. § 2.309(h)(2).

Here, the Commonwealth also has standing because it has suffered injuries that are traceable to the challenged actions and that would be redressed by a favorable decision from this Court. On February 20, 2019, the Commonwealth filed with the NRC a timely petition (i) to intervene in a proceeding concerning a joint request by Pilgrim’s then licensee, Entergy, and Holtec and HDI to transfer Pilgrim’s license to a renamed entity known as Holtec Pilgrim, LLC and HDI, and (ii) for a hearing on that request and an interrelated request by HDI for an exemption to use Pilgrim’s Decommissioning Trust Fund

for purposes otherwise prohibited by the NRC's regulations. The Commission, pursuant to 10 C.F.R. § 2.310(j)(1), was required to issue a decision on the Commonwealth's petition, or inform the Commonwealth when it would do so, on or before May 16, 2019. As of this date, February 26, 2020, the Commission has not complied with either of those two mandated options.

Despite the pendency of the Commonwealth's February 20, 2019 petition (and a petition filed on that same date by another party), the NRC, on August 22, 2019 and acting through its staff and with the Commissioners' tacit approval, issued the License Transfer Order, License Amendment, and Trust Fund Exemption Order, Pet.

Attachments 1, 2, 5. Without addressing any of the Commonwealth's previously expressed objections, the NRC, among other things, struck from Pilgrim's license a longstanding condition that required Pilgrim's licensee to maintain access to a \$50 million contingency fund to cover the cost of decommissioning Pilgrim in the event of a funding shortfall. Also, without addressing any of the Commonwealth's previously expressed objections, the NRC, in the Trust Fund Exemption Order, authorized HDI and Holtec Pilgrim to use Pilgrim's Decommissioning

Trust Fund—a fund created from money collected from Massachusetts electric ratepayers—to pay for costs that the NRC’s regulation’s expressly prohibit, namely, site restoration and spent nuclear fuel management costs. And even though HDI will recover a significant portion of its spent fuel costs from the U.S. Department of Energy (DOE), the NRC did not require HDI to return any of the money it recovers from DOE to the Trust Fund. The NRC’s decision not to do so effectively allows HDI to convert Massachusetts ratepayer funds collected to ensure the safe and complete radiological decontamination of Pilgrim into private profit before Holtec Pilgrim and HDI have fulfilled all of their legal obligations at the plant. Then, relying on its so-called “no significant hazards consideration” regulation, the NRC made the License Transfer Order, License Amendment, and Trust Fund Exemption Order immediately effective. Pet. Attach. 5, at 25. Entergy and Holtec effectuated the license transfer two business days later. Since that time, HDI has been withdrawing millions of dollars from Pilgrim’s Decommissioning Trust Fund and permanently altering the facility.

The Commonwealth suffered a procedural injury when the NRC made the License Transfer Order, License Amendment, and Trust Fund Exemption Order immediately effective prior to a hearing on the issues raised in the Commonwealth's petition and comments on those actions. In making its "Final No Significant Hazards Consideration" determination, the NRC relied on 10 C.F.R. § 2.1315(a), which provides that "[u]nless otherwise determined by the Commission ..., the Commission has determined that any amendment to [a plant's license] ... which does no more than conform the license to reflect the transfer action, involves ... 'no significant hazards consideration....'" *Id.* § 2.1315(a). But, by its plain terms, that regulation does not apply in this case because the NRC's decision to eliminate from Pilgrim's license the condition requiring the licensee to maintain a \$50 million contingency fund to cover decommissioning costs did *much* "more than conform the license to reflect the transfer action." *See id.* § 2.1315(a); *see also id.* § 2.1315(b) (referring only to "*administrative* amendments [that] are *necessary* to reflect the approved transfer" (emphasis added)). Indeed, it made a *substantive* change that stripped from the license a vital funding assurance necessary to protect the Commonwealth and its

citizens from public health, safety, environmental, and financial risks and it did so without affording the Commonwealth its right to a pre-effectiveness hearing. In its Memorandum and Order, the Commission made clear that this determination was final when issued. Thus, the NRC has violated the Commonwealth's procedural right to a pre-effectiveness hearing and that violation has injured the Commonwealth and its citizens by, among other things, transferring Pilgrim's license to entities that are neither financially nor technically qualified to hold it, thereby increasing the risk of public health, safety, environmental, and financial harms to the Commonwealth and its citizens. *See Sugar Cane Growers Coop.*, 289 F.3d at 94-95.

The Commonwealth also suffered a procedural injury caused by the NRC's violations of NEPA. First, the NRC unlawfully segmented its review of (i) the License Transfer Order and License Amendment, (ii) the Trust Fund Exemption Order, and (iii) HDI's revised Post-Shutdown Decommissioning Activities Report (PSDAR) and Site-Specific Cost Estimate. While those actions undeniably depend on one another, the NRC treated them as separate actions for purposes of NEPA. In that regard, the NRC relied on one of its "categorical

exclusions” to exempt the License Transfer Order and License Amendment from any NEPA review whatsoever, Pet. Attach. 5, at 99, 105, and issued a separate and deficient EA and FONSI for the Trust Fund Exemption Order, Pet. Attach. 8. Second, even if not unlawfully segmented, the NRC’s decision to categorically exclude the License Transfer Order and License Amendment from any NEPA review violated NEPA for reasons that are similar to its unlawful invocation of the significant hazards consideration regulation: the decision to eliminate the license’s \$50 million contingency fund requirement for decommissioning costs exceeded the categorical exclusion’s plain scope, which covers only administrative amendments “*required* to reflect the approval.” 10 C.F.R. § 51.22(c)(21) (emphasis added).

Third, even if it was otherwise proper for the NRC to analyze the potential environmental consequences of the Trust Fund Exemption Order apart from the License Transfer Order and License Amendment, the NRC’s EA and FONSI for the Trust Fund Exemption Order were deficient. Like its “Final No Significant Hazards Consideration” and its NEPA Categorical Exclusion determinations, the NRC treated the Trust Fund Exemption Order as administrative in nature even though

the Commission has previously made clear that decommissioning trust funds are the means by which the agency fulfills its “responsibility to protect public health and safety.” 46 Fed. Reg. 11,666, 11,667 (Feb. 10, 1981). In its EA and FONSI, the NRC failed to evaluate the potential direct and indirect environmental consequences of authorizing HDI to withdraw approximately \$500 million from Pilgrim’s Trust Fund for spent nuclear fuel costs without requiring HDI to return to the Trust Fund the portion of those funds that it recovers from DOE. The absence of such a requirement will leave Holtec Pilgrim and HDI without any committed funds to cover spent fuel costs after 2063—decades before its obligation to pay for those costs is virtually certain to end. Brewer 2d. Decl. ¶ 14. Indeed, Holtec Pilgrim and HDI are likely to come up as much as \$768 million short on their obligation to maintain safely Pilgrim’s spent fuel onsite. Brewer 2d. Decl. ¶ 14 & Ex. 3. Spent nuclear fuel, of course, “poses a dangerous, long-term health and environmental risk ... ‘for time spans seemingly beyond human comprehension.’” *New York v. NRC*, 681 F.3d 471, 474 (D.C. Cir. 2012) (quoting *Nuclear Energy Inst., Inc. v. EPA*, 373 F.3d 1251, 1258 (D.C. Cir. 2004) (per curiam)). And if Holtec effectively defaults on its

obligations to maintain and pay-for spent fuel management costs indefinitely, the Commonwealth may be forced to step in and expend its own money and utilize its own resources to safely secure the spent nuclear fuel on site.

The Commonwealth has also suffered harm from the NRC's actions because those action will make it impossible for the new licensee to complete decommissioning successfully and manage Pilgrim's spent nuclear fuel onsite safely for decades or lead to irreversible consequences if regulatory or financial concerns, which are likely to arise, require a modified decommissioning approach. Brewer 2d Decl. ¶ 5. According to HDI's revised decommissioning schedule, it will draw over \$303 million from Pilgrim's Trust during the first seventeen months of the decommissioning, site restoration, and spent fuel management work, representing more than 29 percent of the money available in the Trust Fund if everything goes perfectly according to the licensee's unrealistically ambitious plan. *Id.* ¶ 15. That substantial draw down, however, will leave insufficient funds in the Trust Fund to permit another entity to complete the work or alter the initiated approach outlined in the licensee's schedule should it falter. *Id.* That is

because HDI's accelerated decommissioning approach for Pilgrim may leave the facility in such a state as to preclude a more conservative, long-term approach to decommissioning should HDI's ambitious plan prove unattainable, as the Commonwealth has claimed. *See Id.* As a result, both the environment and local Massachusetts residents will be exposed to increased safety and health hazards—harms that are “assum[ed to be] true for purposes of standing.” *City of Boston Delegation v. FERC*, 897 F.3d 241, 250 (D.C. Cir. 2018). Those harms are directly traceable to the NRC's actions because but for the actions and their immediate effectiveness, the new licensee would not have been able to begin undertaking its expedited decommissioning and site restoration work plan.

The Commonwealth and its citizens will also suffer harm due to the immediate start of decommissioning activities by Holtec Pilgrim and HDI, including health, safety, and infrastructure harms inflicted by, among other things, frequent waste shipments over local roads, which will cause noise, dust, and air pollution emissions, increase the risk of accidents on local roads, and damage local transportation infrastructure. Brewer 2d Decl. ¶ 16. Based on assertions in HDI's

revised PSDAR, which appear to underestimate radioactive waste volume, *id.* ¶ 16 nn.13-14, HDI will need to transport at least 1,400 separate truckloads of radiological waste off-site, which is more than twice the volume the NRC previously evaluated in its Generic Environmental Impact Statement for decommissioning nuclear power plants. *Id.* ¶ 16. When shipments of non-radioactive waste are added, the total number of truckloads will rise to as many as 2,800 to 4,200 total trips. *See id.* Additionally, Holtec Pilgrim and HDI are likely to remove and ship by truck legacy waste from Pilgrim during the months following the August 28, 2019 transfer of Pilgrim's license from Entergy to Holtec Pilgrim and HDI. *See id.* Because of the NRC's actions and their immediate effectiveness, waste shipments will thus begin immediately and cause immediate harm to local land state infrastructure and local health, safety, and the environment. *Id.*

The Commonwealth's injuries would be redressed by a decision from this Court (i) finding the Memorandum and Order denying the Commonwealth's motion for a stay was arbitrary and capricious and not in accordance with law and (ii) invalidating the Memorandum and Order. The Commonwealth's injuries would also be redressed by a

decision from this Court (i) finding that the NRC's determination to make the License Transfer Order, License Amendment, and Trust Fund Exemption Order immediately effective violated the NRC's own regulations and (ii) invalidating the "Final No Significant Hazards Consideration." The Commonwealth's injuries would also be redressed by a decision from this Court (i) finding that the NRC violated NEPA and (ii) invalidating the License Transfer Order, License Amendment, and Trust Fund Exemption Order. The Commonwealth's injuries would also be redressed by a decision from this Court (i) finding that the Trust Fund Exemption Order was arbitrary and capricious and not in accordance with law and (ii) invalidating the Trust Fund Exemption Order. A favorable decision on any one of these issues would redress the Commonwealth's injuries because it would effectively operate as a stay of the License Transfer Order, License Amendment, and/or Trust Fund Exemption Order prior to a hearing before the NRC on the underlying merits and thus prevent Holtec Pilgrim and HDI from performing any decommissioning or site restoration work or withdrawing any more money from the Trust Fund during that period.

Respectfully submitted,
