GA Technologies Inc.
P.O. BOX 81608
SAN DIEGO, CALIFORNIA 92138
(714) 455-3000

August 30,

U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Director of Nuclear Reactor Regulation and
Director of Nuclear Materials Safety and
Safeguards

Gentlemen:

On June 23, 1982, GA Technologies Inc. requested NRC's consent to its acquisition of a number of licenses presently held by General Atomic Company.

This is to supplement the request by assuring you that GA Technologies Inc. as the anticipated successor licensee, adopts and will observe the "General Atomic Quality Assurance Program, topical report GA-A13010A, Amendment 6", for all purposes to which the requirements of NRC regulations concerning quality assurance are applicable. There are no changes affecting the program or the organization established for its performance other than the new corporate name and that in GA-A13010A references to an executive vice president should be read to refer to a vice president. We will not have an EVP.

NRC's prior approval of GA-A13010A was communicated in a letter from Mr. Walter P. Haass dated March 5, 1981.

Very truly yours,

H. M. Agnew
President
