SUBJECT: SOUTH TEXAS PROJECT - NRR SUPPORT TO REGION IV OF
QUADREX REPORT REVIEW

In Task Interface Agreement (TIA) 82-44, dated August 4, 1982, NRR agreed to provide technical support to the Region IV (R-IV) staff in its review of the Quadrex Report. The Quadrex Report deals with the Brown and Root design of the South Texas Project and identified issues that could be of concern.

It appears that the Review Plan, with 2 enclosures, was not transmitted to the Divisions and especially the Branches, along with the TIA. I have enclosed a copy of the complete TIA 82-44 package. Please note that the schedule in Enclosure 2 is not correct. Current plans call for travel to Houston, Texas, only if necessary, to look at information in other work packages, reports, etc.

The final report from Bechtel, EN-619, is now available and will be transmitted as soon as it is received from reproduction.

R-IV would like to issue its final report in October 1982. In order to do this, NRR input needs to be generated in September 1982. C. Oberg, the R-IV coordinator, has developed a form that can be used to provide the written input that he can adapt directly to the R-IV Report. These forms are available and can be obtained from D. Sells.

I believe the review plan is self-explanatory. If you have any questions, contact D. Sells (X27100) the lead Project Manager.
