

SEP 13 1982

MEMORANDUM FOR: File

FROM: C. A. Hooker, Radiation Specialist

30-19181

SUBJECT: JETCO WIRELINE (MONTANA), INC. - LICENSE 25-19743-01

A visit was made to the subject licensee's facility at 505 East Main, Cut Bank Montana, on August 3, 1982, for the purpose of performing an initial inspection. The occupants of the building at this address informed me that Jetco Wireline was no longer located in the area and that Mr. Barrie G. Ibsen, President of Jetco Wireline had moved to Texas.

I contacted Mr. Paul DeKaye by telephone who had been the Field Engineer for the subject licensee. Mr. DeKaye stated that the Americium-241 source possessed by Jetco Wireline (Montana), Inc., had been transferred to Jetco Perforating and Logging Service also located in Cut Bank, Montana. Mr. DeKaye also stated that Mr. Ibsen had moved to Texas, there was no licensed material presently possessed under this license, and that he and Mr. Ibsen wanted to maintain the license in the event they wish to reestablish the business again in Montana.

Mr. DeKaye provided an address for Mr. Ibsen in Texas, which was 1007 Sarah Ann, Nacogdoches, Texas, Telephone: (713) 560-2540. Mr. DeKays residence address is 302 2nd N.E., Cut Bank, Montana 59427, Telephone: (406) 873-4563. As a result this license was not inspected.
