

APPENDIX A

NOTICE OF VIOLATION

GPU Nuclear Corporation
Oyster Creek Nuclear Generating Station

Docket No. 50-219
License No. DPR-16

As a result of the inspection conducted on August 3 - September 7, 1982 and in accordance with the NRC Enforcement Policy, 10 CFR 2 Appendix C (47 FR 9987, March 9, 1982), the following violations were identified:

- A. Technical Specification 6.8.1 requires that procedures be established, implemented, and maintained. Procedure 108, revision 29, April 26, 1982, "Equipment Control", requires that all valves, breakers, or switches affecting safety shall be in a position controlled by a procedure or shall be tagged.

Contrary to the above, on August 14, 1982, the Number 1 Diesel Generator lube oil heater and recirculation pump control switch was found in the "off" position contrary to the operating procedure and was not tagged.

This is a Severity Level V Violation (Supplement I).

- B. Technical Specification 6.11 requires that procedures for personnel radiation protection be prepared consistent with 10 CFR 20 for all operations involving personnel radiation exposure. 10 CFR 20.203 requires that each access point to a high radiation area shall be locked, except when access is required, with positive control over each individual entry. It also requires that the controls be established such that no individual will be prevented from leaving a high radiation area.

Contrary to the above, procedure 902.6, revision 12, June 8, 1982, "General Drywell Clearance", was not consistent with 10 CFR 20.203 in that it did not have adequate provisions to assure that all personnel had exited the drywell, a high radiation area, before locking the access door. This contributed to two individuals being locked in the drywell with no means of exit for about twenty minutes on August 16, 1982.

This is a Severity Level IV Violation (Supplement IV).

Pursuant to the provisions of 10 CFR 2.201, GPU Nuclear Corporation is hereby required to submit to this office, within 30 days of the date of the letter transmitting this Notice, a written statement or explanation in reply, including (1) corrective steps which have been taken and the results achieved; (2) corrective steps which will be taken to avoid further violations; and (3) the date when full compliance will be achieved. Where good cause is shown, consideration will be given to extending your response time.
