

OCT 06 1982

Docket No. 50-341

The Detroit Edison Company  
ATTN: Mr. Donald A. Wells  
Manager, Quality Assurance  
2000 Second Avenue  
Detroit, MI 48226

Gentlemen:

This letter is to clarify the NRC position concerning procedures for admitting NRC personnel to your facilities.

NRC inspectors identified by me on Enclosure 1 as likely to visit your facilities two or more times per year require permanent nonemployee, no-escort-required picture badges as authorized by 10 CFR 73.55(d)(5). Consistent with normal plant escort requirements, individuals on this roster are authorized to serve as escorts for other NRC personnel, consultants, and contractors. For any areas of a plant where a "two-man rule" pertains, combinations of NRC personnel, consultants, and contractors will suffice, provided at least one is from the attached roster.

Region III personnel listed in Enclosure 2 may visit your facilities announced or unannounced at any time of the day or night. Upon presenting official identification, they are to be processed into your facility in the same manner as a nonregular employee. Such inspectors must be badged for unescorted access to the protected area only and must be afforded access to the site without delays other than those normally involved with entrance search and personal identification and registration. Region III personnel not accompanied by an individual listed in Enclosure 1 or 2 are to be provided site access only after telephone verification of access authorization from the Region III Duty or Security Officer.

We request a site orientation relevant to the issuance of badges, escort duties, and emergency evacuation for personnel listed in Enclosures 1 and 2.

OCT 06 1982

The attachments to this letter are effective upon receipt. Enclosures 1 and 2 will be updated every six months in writing. Enclosure 2 may be updated by telephone as necessary by Region III.

We will gladly discuss any questions concerning this matter.

Sincerely,

Original signed by  
James G. Keppler

James G. Keppler  
Regional Administrator

ACCESS LIST

Site: Fermi

Date: OCT 06 1982

This certifies that the persons listed below are employees of the U.S. Nuclear Regulatory Commission. To our knowledge, these persons do not possess adverse character traits or indications of aberrant behavior. These employees have been screened to the national level (including a criminal records check); no disqualifying offenses were noted. Trustworthiness has been determined by a review of their employment records. Based on the above, I recommend that these employees be granted unescorted access to protected and type I and type II vital areas of your facility.

A "Q" access authorization is based on a satisfactory full-field investigation conducted by the Office of Personnel Management (OPM), the Federal Bureau of Investigation (FBI), or another U.S. Government agency which conducts personnel security investigations. An "L" access authorization is based on a satisfactory National Agency Check (NAC) conducted by the Office of Personnel Management.
