Region III  
799 Roosevelt Road  
Glen Ellyn, IL 60137

Attn: D. J. Sreniawski

The following is in response to your letter of Sept. 7, 1982, with corrections of conditions and comments listed chronologically with that letter.

1. Due to the limited nature of our isotope radiography program some periodic items could get by without being done. Now a master schedule of all training sessions, inspections and calibrations has been established and posted in the Radiation Safety Officers office.
2. Same as item number 1.
3. CAUTION HIGH RADIATION AREA signs are now being posted in the high radiation area and we will continue to do so.

Full compliance of the mentioned items will be accomplished on Oct. 11, 1982 when the first periodic safety and training session is held.

Charles E. Whitaker  
Radiation Safety Officer/  
Quality Assurance Manager
