

OCT 5 1982

MEMORANDUM FOR: William J. Dircks  
 Executive Director for Operations

FROM: Victor Stello, Jr., Chairman  
 Committee to Review Generic Requirements

SUBJECT: MINUTES OF CRGR MEETING NUMBER 20

The Committee to Review Generic Requirements met on Tuesday, September 21, 1982. A list of attendees is enclosed.

1. R. Mattson (NRR) briefed the CRGR concerning the proposed resolution of the reactor coolant pump trip issue. The Committee deferred making recommendations concerning this issue until additional information concerning pump run/trip scenarios has been developed by the staff. In this regard, the DEDROGR staff has been tasked to take the lead, working with NRR, RES and AEOD to provide the scenario information to the Committee.
2. R. Baer (IE) briefed the Committee concerning the background, proposed actions and rough cost estimates associated with resolution of the BWR pipe cracking issue. IE indicated that a bulletin on BWR pipe cracking would be proposed and requested that a CRGR meeting be scheduled for the following week to continue discussion of the issue and review the proposed bulletin. As requested, the continuation meeting was scheduled for September 29, 1982. Since briefing the CRGR, IE has met with BWR owners to discuss the proposed bulletin. As a result of information obtained from BWR owners, IE is modifying the bulletin and has requested that the September 29th CRGR meeting be postponed until further notice.

Original Signed by  
 V. Stello
