Docket No. 50-416

LICENSEE: Entergy Operations, Inc.

FACILITY: Grand Gulf Nuclear Station, Unit 1

SUBJECT: SUMMARY OF JUNE 11, 12, AND 13, 1990 MEETINGS REGARDING IMPROVED GRAND GULF NUCLEAR STATION TECHNICAL SPECIFICATIONS

Meetings were held at the Grand Gulf Nuclear Station (GGNS) site to discuss development of Improved BWR-6 Plant Specific Technical Specifications (PSTS) based on the Improved BWR-6 Standard Technical Specifications (STS). BWR-6 STS are being developed as part of the NRC Technical Specification Improvement Program. Enclosure 1 provides a list of attendees at the meeting. Enclosure 2 is the agenda for the meeting.

One objective of the discussions was to determine what changes, if any, to the STS would be needed in order for the STS to be applicable to plant specific BWR-6 TS. Another objective of the meetings was to determine whether the licensee's Draft Improved GGNS TS were consistent with the Improved BWR-6 STS, except where the GGNS design necessitated a difference.

These meetings were the first in a planned series of meetings during which all sections of the Improved BWR-6 STS and their applicability to Improved BWR-6 PSTS will be discussed. Sections 3.2 (Power Distribution Limits), 3.4 (Reactor Coolant Systems) and 3.7 (Plant Systems) were discussed during these initial meetings. The licensee was requested to use the latest Draft Improved BWR-6 STS in their preparation of Draft Improved GGNS TS.
