Attention: Mr. Marvin Peterson, Assistant Director
Office of International Programs
Export/Import and International Safeguards
Mail Station 3H5

Subject: Export license application for shroud
tubes and shroud tube assemblies for
Atucha CNA reactors in Argentina

Reference: Our application dated September 13, 1989 (EXCOM 1027)
Our increase of scope letter dated April 3, 1990

Dear Mr. Peterson:

After recent discussions with our customer, Siemens/KWU in Germany, we would like to increase the scope of work on our application referenced above by adding two pieces of Hafnium control rod drive tube. Please note these pieces were produced and shipped to Siemens/KWU in Germany under our license EXCOM 0035 which expired March 31, 1984. Siemens/KWU needs to have these pieces re-licensed in order to ship them from Germany to Argentina.

Item 17 Description

Add the words "Hafnium control rod drive tubes" after the first word "tubes" in the first line of our description.

Item 19 Maximum Element Weight

Approximately 66 lbs. each control rod drive tube

Item 21 Unit

Two control rod drive tubes

Please let me know if I can answer any additional questions.

Best regards,

90 AUG 13 PM 14
