Seaman Nuclear Corporation
ATTN: Scott C. Seaman
President and Radiation
Safety Officer
7315 South First Street
Oak Creek, WI 53154-0295

License No. 48-12016-01
Docket No. 030-06763

Gentlemen:

This refers to the routine safety inspection conducted by Messrs. D. R. Gibbons and W. T. King of this office on July 2 and 3, 1990, of activities authorized by NRC Byproduct Material License No. 48-12016-01 and to the discussion of our findings with you at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspectors examined actions described in your letters dated January 9, 1985 and February 11, 1985, regarding apparent violations found during our October 25 and November 27, 1984 inspection. We have no further questions regarding these matters.

During this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice. A written response is required.

Violation No. 2 is a repeat item. In your response to this violation, please describe why your proposed corrective action is expected to be more successful in preventing future or similar violations than the corrective action specified in your February 11, 1985 letter.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosures, and your response to this letter will be placed in the NRC Public Document Room.

The responses directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
