Dear Mr. Orser:

SUBJECT: FERMI-2 RESPONSE TO GENERIC LETTER 89-10, "SAFETY-RELATED MOTOR-OPERATED VALVE (MOV) TESTING AND SURVEILLANCE" (TAG NO. 75622)

On June 28, 1989, the NRC issued Generic Letter (GL) 89-10 requesting licensees to establish a program to ensure the operability of all safety-related MOVs under design basis conditions. The program in GL 89-10 significantly expands the scope of the program outlined in NRC Bulletin 85-03 and its supplement.

The schedule provided in the GL requested that a description of your MOV program be available for review by June 28, 1990, or the first refueling outage after December 28, 1989, whichever was later. Due to delays in issuing Supplement 1 of the GL, the staff has decided to delay inspections until at least January 1, 1991. Information that should be contained in your program description was discussed during the workshops held in September 1989. Staff positions on questions presented during the workshops are currently available as Supplement 1 to the GL. As your MOV program is developed, justification for any differences between your program and the GL, as clarified by Supplement 1, should be incorporated into your program description.

Your response to GL 89-10 dated December 28, 1989 (NRC-89-0274), stated that you intend to meet the schedule and recommendations of the GL. Your program description should be retained on-site for possible further NRC staff review.

Sincerely,

/s/

John F. Stang, Project Manager
