Gentlemen:

This refers to the routine, unannounced radiation safety inspection conducted by Mr. Selvan Rajendran of this office on August 22, 1990, of activities authorized by NRC Byproduct Material License No. 35-13184-01, and to the discussion of our findings held by the inspector with members of your staff at the conclusion of the inspection.

The inspection was an examination of activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the inspector.

The radiation safety program appeared to be adequate for the size of your program and the technologists seemed to be knowledgeable in radiation safety procedures established by the hospital. Record keeping procedures established by the radiation safety officer (RSO) were well organized and meticulous.

No violations or deviations were identified.

Should you have any questions concerning this letter, we will be pleased to discuss them with you.

Sincerely,
