Wagoner, Oklahoma 74467

Gentlemen:

This refers to the routine, unannounced radiation safety inspection conducted by Ms. L. L. Kasner and Mr. R. A. Leonardi of this office on August 30, 1990, of the activities authorized by NRC Byproduct Material License No. 35-26836-01, and to the discussion of our findings held by the inspectors with the radiation safety officer (RSO) at the conclusion of the inspection.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the inspectors.

The inspectors observed that although his workload had notably increased during this inspection period, the RSO had continued to focus sufficient attention to the radiation safety program. All required surveys, audits, and equipment calibrations and inspections had been completed within the proper intervals.

Please note that no violations were observed during this inspection and no response to this letter is required.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, we will be pleased to discuss them with you.

Sincerely,

Original Signed By:
