Washington, D.C. 20555

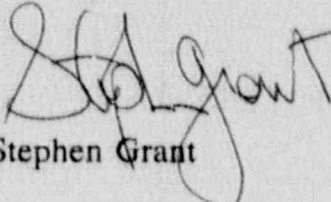

**Re: 10CFR21 Reporting**  
**Power Systems Division of Morrison Knudsen Corporation**

Dear Sir:

On May 25, 1990, Morrison Knudsen Corporation sold its Power Systems Division to Wartsila Diesel, Inc., an affiliate of a Finnish firm. Power Systems Division manufactured and sold diesel powered electrical generating units, some of which are used in nuclear power plants as emergency generators. Morrison Knudsen Corporation is no longer involved in providing safety-related components for nuclear facilities through its Power Systems Division at Rocky Mount, North Carolina. In addition, Power Systems Division has a dedication program for safety-related components for nuclear facilities.

This is to advise you that Morrison Knudsen Corporation will no longer be responsible for reporting 10CFR21 activities for Power Systems Division. To the best of our knowledge, there are no unreported or outstanding actual or potential reportable 10CFR21 Findings associated with the safety-related components assembled, dedicated, fabricated or manufactured by Power Systems Division for use in nuclear facilities.

Very truly yours,

  
Stephen Grant
