Ada, Oklahoma 74820

Gentlemen:

This refers to the routine, unannounced radiation safety inspection conducted by Messrs. Anthony D. Gaines and Gilbert L. Guerra, Jr. of this office on August 22, 1990, of the activities authorized by NRC Byproduct Material License No. 35-14042-02, and to the discussion of our findings held by the inspectors with members of your staff at the conclusion of the inspection.

The inspection was an examination of the activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observations by the inspectors.

No violations or deviations were identified.

The inspectors noted that the radiation safety program appeared to be well organized and that pertinent records for the scope of the program were well maintained.

The inspectors also reviewed the actions you had taken with respect to the violations observed during our previous inspection conducted on September 13-14, 1989. They verified that the corrective actions for the violations had been implemented as stated in your replies dated November 8, November 22, and December 18, 1989.

Should you have any questions concerning this letter, we will be pleased to discuss them with you.

Sincerely,  
Original Signed By:
