Gentlemen:

This refers to the inspection conducted by Mr. M. F. Runyan of this office during the period September 17-20, 1990, of activities authorized by NRC Operating License DPR-40 for Fort Calhoun Station, and to the discussion of our findings with Mr. T. L. Patterson and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included control room habitability (TMI Action Item III.D.3.4.3) and licensee event report followup. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,  
*sig signed by*  
*Duright D. Chamberlain*  
Samuel J. Collins, Director  
Division of Reactor Projects
