Safeguards Inspection Section

Inspection Summary

Inspection Conducted August 20-24, 1990 (Report 50-313/90-29; 50-368/90-29)

Areas Inspected: Routine, unannounced inspection of the licensee's physical security program. The areas inspected within the physical security program included security plans and audits; protected and vital area physical barriers, detection and assessment aids; protected and vital area access control of personnel and packages; alarm stations and communications; testing, maintenance, and compensatory measures; and followup on previous inspection findings.

Results: Within the areas inspected, one apparent violation was identified (failure to maintain tamper alarm while door magnetic switch is in access mode on 33 vital area doors, paragraph 3). Two open items are also identified in paragraph 3.

The licensee is establishing an improved and effective security program. Perimeter improvement projects have been completed and appear to be adequate at
