Docket No. 50-374

Commonwealth Edison Company  
ATTN: Mr. Cordell Reed  
Senior Vice President  
Licensing Department-Suite 300  
Opus West III  
1400 Opus Place

Gentlemen:

This refers to the special safety team inspection conducted by Messrs. M. J. Kopp and G. M. Hausman of this office on September 17 through September 21, 1990, of activities at the LaSalle County Station, Units 1 and 2, authorized by NRC Licenses No. NPF-11 and No. NPF-18 and to the discussion of our findings with Mr. G. J. Diederich at the conclusion of the inspection.

The purpose of this inspection was to follow up unresolved items previously identified in Inspection Reports No. 50-373/88027(DRS) and No. 50-374/88026(DRS) relative to the implementation of commitments pertaining to Regulatory Guide (RG) 1.97.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

Certain other activities, set forth in the enclosure to this letter, appear to be a deviation from commitments which you have made in previous correspondence with the Commission. A written response is required.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosures, and your response to this letter will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

Original Signed by Mark A. Ring
