

March 2, 1994

Docket No. 50-263

Northern States Power Company  
ATTN: Mr. D. D. Antony  
Vice President Nuclear Generation  
414 Nicollet Mall  
Minneapolis, MN 55401

Dear Mr. Antony:

SUBJECT: REQUALIFICATION EXAMINATION REPORT

During the week of February 14, 1994, Mr. R. Doornbos and others administered requalification examinations to employees of your organization who operate your Monticello Nuclear Power Station. At the conclusion of the examination preliminary findings were discussed with those members of your staff identified in the enclosed report.

Written and operating requalification examinations were administered to nine Senior Reactor Operators (SROs), and three Reactor Operators (ROs). Two operating crews, and one staff crew, were evaluated on the simulator portion of the NRC examination. Three SROs who had been evaluated during previous examinations participated only during the dynamic simulator scenarios to complete crew compositions. All participants passed their requalification examination.

Based on the results of the examination and in accordance with the criteria of NUREG-1021, Revision 7, Operator Licensing Examiner standards, ES-601, the Monticello Requalification Training Program has been assigned an overall program rating of satisfactory.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosures will be placed in the NRC's Public Document Room.

Should you have any questions concerning this examination, please contact us.

Sincerely,

original signed by  
Mark A. Ring, Branch Chief,  
Division of Reactor Safety
